PROFESSIONAL SUMMARY

Data and financial analyst with a corporate tax background, working in Power BI, SQL Server and Excel. I build dimensional models and dashboards from primary source data — most recently an analysis of effective corporate tax rates across ten EGX-listed companies, sourced from audited financial statements and delivered as both a Power BI report and a written technical paper.

ANALYTICS PROJECTS

Effective Tax Rates on the Egyptian Exchange | Excel · SQL Server · Power BI · DAX

- Analysed what ten EGX-listed companies across six sectors paid in corporate tax over FY2021–2024, sourced from audited financial statements.
- Built a star schema over SQL Server views and a Power BI report on top of it; weighted-average effective tax rate of 20.4% against Egypt's 22.5% statutory rate, with company rates ranging from 11.3% to 25.8%.
- Established that headline effective rates are not comparable across companies without adjusting for reporting basis and income mix, isolating equity-accounted associate income and fair-value gains as the principal distortions.
- Reconciled all 38 company-years against three automated checks and documented method, exclusions and limitations in a seven-page technical report.

Transaction Monitoring & Fraud Flag Validation | Power BI · DAX

- Built a monitoring dashboard over 5.0M transactions across four payment channels and nine cities — volume, value, channel mix and daily trend.
- Tested whether the fraud flag carried any signal before building detection views: flag rates ran 3.58%–3.60% across every city and channel against a 3.59% baseline, and risk scores were identical for flagged and unflagged rows — evidence the flag had been assigned at random. Documented the negative finding rather than reporting patterns the data could not support.

Sales & Performance Dashboard | Power BI · DAX

- Built a Power BI dashboard analysing sales trends, cost structure and profit margins by region, product and segment, with variance analysis against targets.

EXPERIENCE

Business Tax Analyst — Grant Thornton — Saleh, Barsoum & Abdelaziz (GT-SBA) *Nov 2024 – Present*

- Reviewed 50+ Corporate Income Tax returns and handled 7+ full CIT compliance engagements under Egyptian tax law.
- Completed 3+ payroll reviews covering Form 4 and Form 6, alongside withholding tax review and Form 41 reporting, verified against filing deadlines.
- Support transfer pricing and tax advisory projects, including documentation and benchmarking analysis.
- Work with senior advisors to deliver tailored compliance and reporting solutions to corporate clients.

Customer Service Representative — MGN (Mashreq Global Network) *Sep 2023 – Oct 2024*

- Handled inbound calls from UAE banking clients in English and Arabic, advising on products and resolving service issues against accuracy and satisfaction targets.

General Accountant — Bandmakers Music Academy *Sep 2021 – Aug 2023*

- Maintained accounts payable, receivable and payroll across multiple branches; prepared monthly financial statements and handled reconciliations and billing.

SKILLS

- Power BI — data modelling, star schema design, DAX measures, drill-through, performance optimisation
- SQL — SELECT, JOINS, aggregations, views for reporting layers; Advanced Excel — Power Query, pivot tables, advanced formulas
- Financial analysis — variance analysis, profitability review, effective tax rate analysis, KPI reporting; data validation and reconciliation; tax software and ERP systems
- Languages — Arabic (native), English (fluent)

EDUCATION & CERTIFICATIONS

– Bachelor of Commerce (English Section) — Accounting Major, Helwan University (2023) · Microsoft PL-300, Power BI Data Analyst — in progress
